Chip Inductors - 0402CS Series (1005)

Coilcraft is introducing the industry's first 0402 wire-wound inductor.

This new series shares all of the characteristics of Coilcraft's other ceramic inductors: exceptionally high Q factors, especially at use frequencies; outstanding SRFs;

tight inductance tolerances; and excellent batch-to-batch consistency.

Coilcraft **Designer's Kit C128** contains samples of all inductance values (5% tolerance where available). To order, contact Coilcraft or visit <http://order.coilcraft.com>.

Part number ¹	Inductance ² (nH)	Percent tolerance ³	Q Min ⁴	SRF Min ⁵ (MHz)	R _{DC} Max ⁶ (Ohms)	I _{DC} Max ⁷ (mA)	900 MHz		1.7 GHz

• For environmental data see "Product Specifications" section (Document 121).

1. When ordering, please specify tolerance and packaging codes:

0402CS-40NX_BG

Packaging

G= EIA RS-481 paper carrier (standard).

For orders of less than a full reel, there is a \$25 per reel charge to make them machine-ready.

B= Bulk. In a carrier tape but without leader or trailer.

Inductance tolerance

J=5%, K=10%

Table above shows stock tolerances in bold.

2. Inductance measured using Coilcraft SMD-A fixture in HP4286 impedance analyzer with Coilcraft-provided correlation pieces. For recommended test procedures, contact Coilcraft.

3. Tolerances in bold are stocked for immediate shipment.

4. Q measured using HP4291A with HP16193 test fixture.

5. SRF measured using HP8753D network analyzer and Coilcraft SMD-D test fixture.

6. R_{DC} measured on micro-ohmmeter.

7. For 15° C rise.

8. Operating temperature range -40° C to +125° C.

9. Electrical specifications at 25° C.

Specifications subject to change without notice. Document 198-1 Revised 8/16/99
