# Backlight Inductors - DO1607BL Series

The low profile DO1607BL Series has the high break-down voltage ratings required for backlight applications. Only .098 (2,49) high, they have a footprint of .26 x .175 (6,6 x 4,5).

These inductors are constructed of high temp materials that provide excellent heat deflection to prevent damage during solder reflow. They are packaged on either 7" or 13" reels.

Standard inductance values range from 1 to 6.8 mH and custom values are available to meet specific requirements.

Coilcraft **Designer's Kit C135** contains samples of each of the standard parts shown. To order, contact Coilcraft or visit <http://order.coilcraft.com>.
