

The basic idea behind our new low profile Power Wafer™ inductors

We squeezed high performance magnetics into a package as thin as 1.19 mm!

These remarkable new Power Wafer™ inductors have everything you've been looking for: low profile, high current, tiny footprint and minimal EMI.

Each series measures 2 mm or less. The thinnest uses Coilcraft's new In-Board Technology™ to keep overall height to just 1.19 mm above your board. And custom versions can lower that to 0.9 mm!

For specifications and free evaluation samples of these low profile, high performance inductors roll on over to www.coilcraft.com/powerwafers.

LPO25061B 1.19 mm high
4.7 - 1000 μ H Up to 1.9 A

LPO25060B 1.65 mm high
4.7 - 1000 μ H Up to 1.9 A

LPT3305 1.8 mm high
1 - 47 μ H Up to 6.0 A

LPT1606 2 mm high
1 - 22 μ H Up to 3.0 A

DO1606 2 mm high
1 - 1000 μ H Up to 2.5 A
