

Trituner 3-in-1 Tuning Wrench

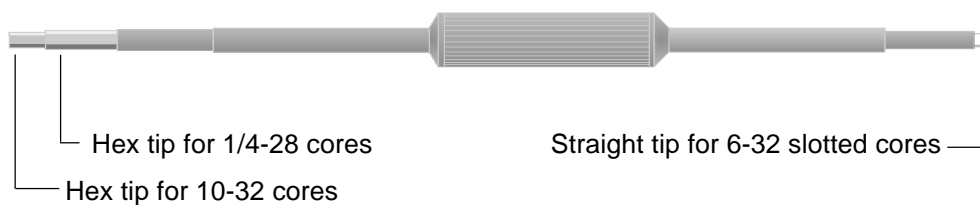

Coilcraft's Trituner™ tuning wrench is a unique 3-in-1 tool for adjusting inductors, capacitors and many other variable components.

The non-magnetic Trituner is molded of rugged PET thermoplastic material. One end is stepped with a hex tip for 1/4-28 cores and a smaller hex tip for 10-32 cores. Both tips have a large surface area to prevent fragile cores from stripping or breaking.

The other end has a molded-in ceramic straight tip for 6-32 slotted cores. This provides the strength of steel but is totally non-magnetic.

- Ideal for tuning leaded and surface mount parts.
- Non-magnetic ceramic screwdrive tip for durability
- One tool does the work of three
