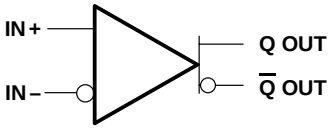
symbol (each comparator)



description

The TL3116 is an ultra-fast comparator designed to interface directly to TTL logic while operating from either a single 5-V power supply or dual ±5-V supplies. The input common-mode voltage extends to the negative rail for ground sensing applications. It features extremely tight offset voltage and high gain for precision applications. It has complementary outputs that can be latched using the LATCH ENABLE terminal. Figure 1 shows the positive supply current of the comparator. The TL3116 only requires 12.7 mA (typical) to achieve a propagation delay of 10 ns.

The TL3116 is a pin-for-pin functional replacement for the LT1116 comparator, offering high-speed operation but consuming much less power.

AVAILABLE OPTIONS

T_A	PACKAGED DEVICES		CHIP FORM‡ (Y)
	SMALL OUTLINE† (D)	TSSOP (PW)	
0°C to 70°C	TL3116CD	TL3116CPWLE	TL3116Y
–40°C to 85°C	TL3116ID	TL3116IPWLE	—

† The PW packages are available left-ended taped and reeled only.
‡ Chip forms are tested at T_A = 25°C only.

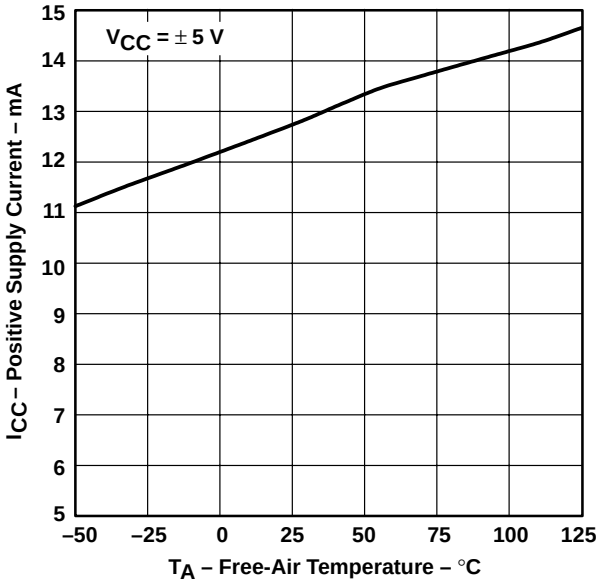

Figure 1

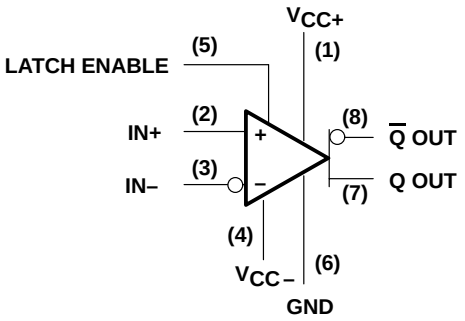
TL3116Y chip information

This chip, when properly assembled, displays characteristics similar to the TL3116C. Thermal compression or ultrasonic bonding may be used on the doped-aluminum bonding pads. Chips may be mounted with conductive epoxy or a gold-silicon preform.

BONDING PAD ASSIGNMENTS



CHIP THICKNESS: 10 MILS TYPICAL

BONDING PADS: 4 × 4 MILS MINIMUM

T_J max = 150°C

TOLERANCES ARE ±10%.

ALL DIMENSIONS ARE IN MILS.

TERMINALS 1 AND 6 CAN BE CONNECTED TO MULTIPLE PADS.

COMPONENT COUNT	
Bipolars	53
MOSFETs	49

Capacitors	14

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

Supply voltage, V_{DD} (see Note 1) . . . . . – 7 V to 7 V
Differential input voltage, V_{ID} (see Note 2) . . . . . 7 V
Input voltage range, V_I . . . . . 7 V
Input voltage, V_I (LATCH ENABLE) . . . . . 7 V
Output current, I_O . . . . . ± 20 mA
Continuous total power dissipation . . . . . See Dissipation Rating Table
Operating free-air temperature range, T_A . . . . . –40°C to 85°C
Storage temperature range, T_{stg} . . . . . – 65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds . . . . . 260°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values, except differential voltages, are with respect to network ground.
2. Differential voltages are at IN+ with respect to IN–.

DISSIPATION RATING TABLE

PACKAGE	$T_A \le 25°C$ POWER RATING	DERATING FACTOR ABOVE $T_A = 25°C$	$T_A = 70°C$ POWER RATING
D	725 mW	5.8 mW/°C	464 mW
PW	525 mW	4.2 mW/°C	336 mW

electrical characteristics at specified operating free-air temperature, V_{DD} = ±5 V, V_{LE} = 0 (unless otherwise noted)

		V_{LE} = 2 V		24	39		24	45	µA

† Full range for the TL3116C is T_A = 0°C to 70°C. Full range for the TL3116I is T_A = –40°C to 85°C.
‡ All typical values are measures with T_A = 25°C.

switching characteristics, $V_{DD} = \pm5$ V, $V_{LE} = 0$

PARAMETER		TEST CONDITIONS†		TL3116C			TL3116I			UNIT
				MIN	TYP	MAX	MIN	TYP	MAX	
t_{pd1}	Propagation delay time‡	ΔV_I = 100 mV, V_{OD} = 5 mV	T_A = 25°C		9.9	12		9.9	12	ns
			T_A = full range		9.9	14		9.9	15	
		ΔV_I = 100 mV, V_{OD} = 20 mV	T_A = 25°C		8.2	10.3		8.2	10.3	
			T_A = full range		8.2	12.7		8.2	13.7	
$t_{sk(p)}$	Pulse skew ($\lvert t_{pd+} - t_{pd-} \rvert$)	ΔV_I = 100 mV, T_A = 25°C	V_{OD} = 5 mV,		0.5			0.5		ns
t_{su}	Setup time, LATCH ENABLE				3.4			3.4		ns

† Full range for the TL3116C is 0°C to 70°C. Full range for the TL3116I is –40°C to 85°C.

‡ t_{pd1} cannot be measured in automatic handling equipment with low values of overdrive. The TL3116 is 100% tested with a 1-V step and 500-mV overdrive at T_A = 25°C only. Correlation tests have shown that t_{pd1} limits given can be ensured with this test, if additional dc tests are performed to ensure that all internal bias conditions are correct. For low overdrive conditions, V_{OS} is added to the overdrive.

IMPORTANT NOTICE

Texas Instruments (TI) reserves the right to make changes to its products or to discontinue any semiconductor product or service without notice, and advises its customers to obtain the latest version of relevant information to verify, before placing orders, that the information being relied on is current.

TI warrants performance of its semiconductor products and related software to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications").

TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, INTENDED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT APPLICATIONS, DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS.

Inclusion of TI products in such applications is understood to be fully at the risk of the customer. Use of TI products in such applications requires the written approval of an appropriate TI officer. Questions concerning potential risk applications should be directed to TI through a local SC sales office.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards should be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein. Nor does TI warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used.
