

MCHF SDR . Number of Turns on Toroid's in LPF and SWR and uH value as listed in Schematic.

L13 to L24 are T37-2 (30 SWG is 0.315mm as recommended in Schematic)

SWR toroid's
FT50-43 T2, T3
0.45mm wire
26SWG = 0.45720
Ten Turns + 1
single hairpin loop

● Important
Connection point
inside or outside
toroid

NB Turns may need to be adjusted to reach the exact uH value as listed on the schematic
