

THE AEROSOL THAT ACTS LIKE A SPRAY GUN

STANDARD
AEROSOL

SPRAY GUN

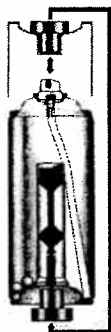

SPRAYMAX

"SPRAYS LIKE NO OTHER AEROSOL ON THE MARKET!"

What does SPRAYMAX offer that other aerosols don't?

SPRAYMAX is the only product that delivers professional spray gun quality finish from a 1K and 2K aerosol. Featuring innovative propellant technology and a patented nozzle and valve design, SPRAYMAX provides high output, larger spray patterns and excellent atomization with constant pressure.

How does the 2K aerosol work?

Our patented 2K design separates the activator in an internal cylinder. To use:

- Remove the red button from the outer cap.
- Turn the can upside down and place it on a stable surface.
- Insert the red button into the pin on the bottom of the can. Firmly press the red button until it reaches the end.
- Shake and apply.

Over 15 aerosols to choose from: Solvent cleaners, plastic prep, 1K & 2K primers and 2K clears.

SPRAYMAX® aerosols exclusively distributed by
